How does Career Planning happen today?

Most often students choose careers based on other's preferences, be it:

- Following the crowd (peers)
- Accepting choices made by parents
- Influence by media
- Following the current trends or availing the most sort after career opportunities.

How Career Planning Helps:

Unlimited options- what do I choose?

How much time??
How much Money??

- With colleges and universities offering numerous courses today, for a student, it is truly confusing making a choice.
- For a student, choosing a career path that is far from ones' interest & ability can cause dissatisfaction in the long run.
- Hence it is essential to plan ones career from a long term perspective.

Dear Students,

Being teachers, we care for your future !!

Guys, we planned to Shape Your Career in a specific way.
