A sufficient number of Faculty members are serving the College for the welfare of Students. Our College is accredited with Grade-1 by NAAC.

About the Conference
 The design, development and discovery of drug candidate are a challenging task. The pharmaceutical companies, biotechnological industries along with the academician are collaborating to find a cure to the new disease and proposing a better solution to existing one. There has always been and continue to be a need for newer chemical entities with diverse pharmacophoric properties. The structure is a starting point for drug discovery. Drug molecule is like a duplicate key to jam the lock like an inhibitor or open the lock like an activator. So, the drug molecule is an inhibitor or an activator. Chemistry is the central science and plays the most critical role in the drug development process.
 So taking into account the multidisciplinary nature of chemical science, we have organised an **International Interdisciplinary "Virtual Conference on Drug, Disease and Development"**. The conference will explore the different research and development in the area of drug, disease and development.

The objectives of the conference

- To provide an opportunity for the participants throughout the world to share their rich experience and ideas with the other participants expected to join from different parts of the globe.
